

Ross Hill

Toronto, Ontario · ross@rosshill.ca · 647-968-2019 · RossHill.ca

EDUCATION

Bachelor of Computing Honours in Software Design (SODE-P-BCH)
Queen's University

September 2016 - Present
Kingston, Ontario

PROFESSIONAL EXPERIENCE

Software Developer Intern
Verafin

May 2019 - August 2019
Toronto, Ontario

- I made multiple upgrades and bug fixes to the user interface that were requested by Verafin clients
- I created a software plugin that identifies high risk customers across hundreds of institutions, based on transaction and biographical characteristics

Full Stack Developer Intern
Nudge.ai

May 2018 - August 2018
Toronto, Ontario

- I implemented a system for receiving, verifying, and handling GDPR requests
- I added the capability for users to suggest changes to the information shown in our public pages with an intuitive interface

Front End Developer Intern
Nudge.ai

May 2017 - August 2017
Toronto, Ontario

- Using React.js with Redux, I created a modern interface for Nudge employees to carry out administrative tasks
- Interacting with a RESTful API, this interface allows an administrator to create, delete, or modify accounts, and to directly access and modify person and company data used by the sales platform

ORGANIZATIONS

Director of Controls, Data, and Automation
Queen's Vertical Farming Team

October 2019 - Present
Kingston, Ontario

- In charge of running weekly meetings, setting goals, and providing technical assistance to team members
- The CDA team is building an automated system for adjusting environment variables, such as temperature or light intensity, in order to maximize crop yield

Software Developer
Queen's Technology and Media Association

September 2019 - Present
Kingston, Ontario

- Software developer in an eight-person product team, within a tech incubator at Queen's University
- Building a user interface using React.js for Studii, a collaborative studying web application for students

Software Developer
QHacks

April 2018 - March 2019
Kingston, Ontario

- I helped build the landing page for the event and a web portal which over 1800 students used to apply
- The websites were built with React and used GraphQL to retrieve data for the user interface

PROJECTS

Metaprojection *React, Gatsby, GraphQL*

metaprojection.ca

MetaProjection is a website that aggregates multiple Canadian federal electoral projections in order to provide an overview of how the election is playing out, both federally and by district

Mandelbrot Set Visualizer *Python*

rosshill.ca/item/mandelbrot-set-explorer

An application for exploring Mandelbrot set fractal, using multiprocessing for improved performance

SKILLS

Programming Languages: JavaScript, Python, C#, PostgreSQL, GraphQL, HTML, CSS, Java

Libraries: React, Svelte, Django, Gatsby, Backbone.js, Arduino, Raspberry Pi, .NET
